EARLY HISTORY OF HONG KONG

The history of the Hong Kong community is really much longer than the history of the Colony itself. The Colony exists as an emporium for foreign trade with South China, and was founded in 1841, when the firms that had previously found a more or less insecure foothold in Macao or Canton began to migrate to the island where they could carry on their business under conditions of their own making, and under the protection of the British fleet.

It was in the early years of the 17th century that the Honourable East India Company first began to take an interest in Far Eastern trade. Japan had not then closed its ports to foreigners, and it was at Firando in Japan that the Company established its first factory; others followed at Tywan in Formosa, and then at Amoy. At that time any trade done with Southern China was done through the Portuguese merchants of Macao. The Ming Dynasty, which was then nearing the end of its long reign, was favourable to foreign trade, and an attempt was made to establish a branch of the Honourable Company at Macao. The difficulty that arose was not from the Chinese but from the merchants of Macao, who were reluctant to admit a competitor that might become too powerful. As a matter of fact the history of the Company's two centuries of trading under all sorts of restrictions, some of them distinctly undignified, showed none of the masterful diplomacy which distinguished the policy of the Board of Directors in India, and from 1625 to 1834 trade was carried on in spite of restrictions and exactions which gradually became systematised into a monopoly on the Chinese side which was as exclusive as the Company's own.

The cancellation of the Company's Charter was one of the many results of the Reform Act which threw open Parliament to the classes that were rising to power and wealth through the Industrial Revolution, represented by merchants whose interests and prejudices were all in favour of the most complete free trade procurable, and it was not long before the "interlopers," who had found means to do a considerable amount of business under the old system, began to demand a base of operations where they would not be subject to the whims of officials whose sole object was either to hamper their operation or to extract profit from them.

From the very first the island of Hong Kong, which was eventually chosen, and which had at that time not even a name, was developed on a basis of free trade and equal opportunities for all, and the tradition has lasted down to the present time.

At first the intention of the Home Government was to make the Governor of Hong Kong their representative for all purposes in the conduct of diplomacy and business with China and the Far East; but the system was found to work unsatisfactorily, and, after some thirty years, the functions of local Government were separated from those of wider policy, and an Embassy was established at Peking.

The growth of trade made it necessary to acquire a larger strip of land on the Kowloon side of the harbour, and some two square miles, including an island in the harbour called "Stonecutters," were leased in perpetuity. The island is now reserved purely for military purposes, but the added territory is to-day a busy dock area and thickly populated.

THE COLONY OF HONG KONG

Prior to 1841 there was no recognised name for the island of Hong Kong. The anchorage at Aberdeen was known to sailors as Heung Kong. The Chinese characters representing the name may be translated by "Fragrant Streams" or "Fragrant Harbour." Another possible rendering is "Heung's Harbour," the haunt

of a notorious character named Heung.

Kowloon is the anglicised form of the Chinese Kau Lung (nine dragons). This name is derived from the ridge of nine hills which form a rampart along the northern side of the harbour and seem to guard the approach to China,

Hong Kong became a British Colony in 1841. In 1860 about two square miles of the mainland of Kowloon and Stonecutters' Island were leased in perpetuity. The district called the "New Territory" was leased to Great Britain in 1898 for a period of 99 years. It covers 276 square miles and include Lan Tao Island and the waters of the farther shores of Deep Bay and Mirs Bay.

A book entitled "China," published in 1847, contains a chapter with the following heading: "Hong Kong, its position, prospects, character and utter worthlessness from every point of view to England." To-day one laughs at that prophecy. However when it was written there seemed to be reason for such a gloomy forboding for the place had an unenviable reputation for rain-storms, typhoons, pirates, poisoners, malaria, dysentery, etc., and in England contempt for the new colony was expressed in the then popular song, "You may go to Hong Kong for me."

To-day this formerly despised possession is one of world's busiest ports, and for an eastern city is remarkably clean, peaceable and healthy. As one writer remarks: "Hong Kong is a splendid example of what can be accomplished energy and capital associated with the courage and restraint that go hand-in-hand with British colonisation. Ninety-six years of patient administration by 21 Governors and 11 Administrators have brought Hong Kong into the front rank of the world's commerce. This happy achievement is due in no small measure to the harmonious working of two such different peoples as the British and the Chinese."

Hong Kong owes its present status to its wonderful harbour, to the security, law and justice which are synonymous with British rule, and to the industry of the Chinese. A free port except for dues on liquor, tobacco and opium, Hong Kong does an enormous trade, and ranks among the world's foremost maritime cities. Owing to its fortunate position ships from every part of the globe bring all sorts of cargo to be transhipped here to smaller steamers and junks for China via Canton and the coastal ports. It is a huge emporium or entrepot and actually produces nothing but granite. The chief indus-

tries are the building and repairing of ships and the making of rope, cement, glass, cigarettes, cigars, matches and paper.

The best time to visit Hong Kong is during the winter months, when British conditions are enjoyed. Between March and May the weather is apt to be changeable and clammy, and from May till the end of September it is too hot and humid to be comfortable. The shade temperature ranges from 50 degree F. in January and February to 90 degree F. in the Summer months, and greater extremes are known. The average shade temperature for the year is slightly over 70 degree F. Geologically, Hong Kong cannot be declared interesting, but it holds great attractions for the botanist and the entomologist. Its scenery is superb and there are few prettier drives than the one round the island or that on the mainland from Kowloon to Tai Po or Kowloon to Castle Peak. There are also glorious rambles to be had in winter on the island and in the mainland hills.

Few places can show such a variety of games and recreations. Golf, tennis and yachting are indulged in all the year round; football and Rugby and Association), cricket and hockey are played in the Winter months; and during Summer lawn bowls, lawn tennis, baseball and perfect bathing are enjoyed. The Jockey Club hold a five-day Annual Meeting every February in addition to thirteen "Extra Meetings" throughout the year.

In Hong Kong East meets West. The latest from London, Paris and New York can be found cheek by jow! with all the alluring work of the Orient. If one wishes to travel in town one may do so by motorcar, taxi, bus, tram, rickshaw or sedan chair, while on the harbour motorboats, ferries, launches and sampans are at one's disposal.

The water is pure, the food good and plentiful and hotel and boarding-house accommodation first class. Hong Kong boasts a University, secondary and primary schools, numerous places of worship, up-to-date hospitals, modern cinema houses, and the finest golf course (at Fanling, in the New Territories) in the Far East.

1891	Sir Wm. Robinson, K.C.M.G.		

The Government is administered by a Governor, aided by an Executive Council of eight officials and seven unofficials. The Legislative Council is presided over by the Governor, and is composed of the Officer Commanding the Troops, the Colonial Secretary, the Attorney-General, the Financial Secretary, the Secretary for Chinese Affairs, the Director of Public Works, the Director of Medical & Sanitary Services, the Superintendent of Imports & Exports, and eight unofficial members, of whom is elected by the Chamber of Commerce and another by the Justices of the Peace. The remaining six, three of whom are of Chinese race but British nationality, are appointed by the Government.

The new constitution, which it is expected will be introduced before the end of this year, provides for a popularity elected Municipal Council, and for a Legislative Council which will include eight Unofficials and only seven Official Members. Four of the Unofficials will be nominated by the Governor and the remainder will be elected by the Justices of the Peace, the Chamber of Commerce and two by the Municipal Council.

DUTIABLE COMMODITIES

HONG KONG.

Resolution made and passed by the Legislative Council under Section 4 of the Dutiable Commodities Ordinance 1931 on 31st March, 1949.

Published in the Government Gazette of 31st March, 1949, Government Notification No. A64.

Resolved pursuant to Section 4 of the Dutiable Commodities Ordinance 1931 that the regulations made under the said Ordinance relating to duty on table waters be amended as follows:—

AMENDMENT.

On page 1351 of Volume III of the Regulations of Hong Kong (1937 Edition), under the Heading "Duty on table waters", the figures and words "48 cents per gallon" shall with effect from midnight on 31st March, 1949, be substituted for the figures and words "24 cents per gallon."

J. L. HAYWARD,

DUTIABLE COMMODITIES ORDINANCE, 1931.

Resolution under section 4.

WHEREAS by section 4 of the Dutiable Commodities Ordinance, 1931, it is provided that the Legislative Council may from time to time by resolution impose any duty on any dutiable goods or any class of dutiable goods, and lower, increase, decrease or vary any such duty to any extent whatever;

AND WHEREAS by a resolution made and passed by this Honourable Council under the said section the 3rd March, 1948, it was provided that in respect of importations paid for after the 25th January, 1948, the rate for the purpose of calculating the Hong Kong dollar equivalent of French francs in connection with the duty on toilet preparations and proprietary medicines should be Hong Kong \$1 to 54 French francs;

AND WHEREAS the value of the French franc in relation to the Hong Kong dollar has in fact varied from time to time since the date aforesaid;

NOW THEREFORE IT IS HEREBY RESOLVED under section 4 of the Dutiable Commodities Ordinance, 1931, that in respect of importations paid for after the date hereof, the rate for the purpose of calculating the Hong Kong dollar equivalent of French francs in connection with the duty on toilet preparations and proprietary medicines, as imposed by a resolution of this Council passed on the 3rd December, 1947, and made under the said Ordinance shall be the official rate of exchange prevailing at the date of consignment of any such importation as aforesaid in place of the rate of Hong Kong \$1 to 54 French francs established by the resolution of this Council passed and made under the said Ordinance on the 3rd March, 1948.

RESOLVED by the Legislative Council of Hong Kong this 20th day of July, 1949.

G. C. HAMILTON,
Clerk of Councils.

LOCAL STORM SIGNAL CODE.

(As approved at the Conference on Storm Warning Procedures held in Manila, May, 1949, for use in Hong Kong as from 1st January, 1950).

	NUMBER	DAY SIGNAL	NIGHT SIGNAL	MEANING
STANDBY	1		White White White	A depression or typhoon exists which may affect the locality.
GALE	5		White Green Green	Gale (wind speed 34 knots and upwards) expected from the NW quadrant.
	6		Green White White	Gale (wind speed 34 knots and upwards) expected from the SW quadrant.
	7		Green Green White	Gale (wind speed 34 knots and upwards) expected from the NE quadrant.
	8		White White Green	Gale (wind speed 34 knots and upwards) expected from the SE quadrant.
INCREASING GALE	9		Green Green Green	Gale expected to increase.
TYPHOON	10		Red Green Red	Hurricane or typhoon wind (speed 64 knots and upwards) any direction.

STRONG WIND SIGNAL

	White Green White	Strong wind (speed 22-33 knots).
---	-------------------------	----------------------------------

SIGNALS USED AT SUPPLEMENTARY STATIONS.

	Green Green	Strong wind (speed 22-33 knots).
	Red Green	No. 1 hoisted in Hong Kong harbour.
	Red Red	Nos. 5, 6, 7, 8, 9 or 10 hoisted in Hong Kong harbour.

+ International signals.

EXPLANATORY NOTES.

Signal No. 1 is a cautionary or "stand by" signal, and does not necessarily imply bad weather.

Signals Nos. 5 to 8 convey definite warning of expected gales from different directions. A "gale" is equivalent to a mean wind velocity of 34-40 knots, but gusts may reach 60 knots. These four signals are therefore of equal significance as regards wind velocity, but are for different wind directions.

Signal No. 9 will not necessarily be used if conditions warrant the hoisting of No. 10 as soon as it is evident that the gale will increase.

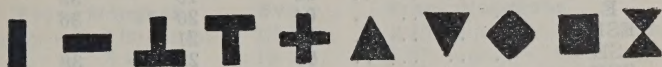

Signals will be lowered when danger is considered to be over.

The Black Ball (strong wind warning signal) is primarily intended to warn small craft of the onset of strong winds which are not expected to reach gale force. It may be hoisted to give warning of strong monsoon winds in winter, or of winds due to tropical depressions of small intensity.

THE CHINA SEAS NON-LOCAL STORM SIGNAL CODE FOR VISUAL STORM WARNINGS

(As amended by agreement between the Meteorological Service of Indo China, the Central Weather Bureau of China, and the Royal Observatory, Hong Kong, and used from 1st January, 1950).

1. The following ten symbols are used:—

indicating the figures

1 2 3 4 5 6 7 8 9 0

2. These signals are hoisted at the mast head and at the yard-arms of a storm signal mast, and have the following significance:—

- (a) 1 symbol at the mast head showing the time at which the centre of a tropical cyclone was in the position indicated (Table I).
- (b) 4 symbols at one yard-arm showing the position of the centre. The two upper symbols give by their corresponding numbers the latitude in degrees; the two lower symbols the longitude in degrees (initial 1 omitted for longitudes of 100° or over).
- (c) 3 symbols at the other yard-arm. The two upper symbols of this group show the speed and direction of motion of the centre at the time of observation, or, alternatively, certain conditions (Table II).

The lowest symbol of this group shows the intensity of this cyclone, together with the degree of accuracy with which the centre has been located (Table III). The latter is specified as the radius of the circle whose centre is shown by the latitude and longitude. Thus the position indicated by the latitude and longitude signals does not purport to be the exact position of the storm centre, but merely the centre of a circle of specified radius within which the centre of the storm is believed to lie.

C

C for COW & GATE

That Cow & Gate look!

There is a feeling of restfulness throughout the house. Worry and anxiety have given place to relief and cheerfulness —
BABY IS ON COW & GATE NOW!

Look at him! All chuckles and chubbiness — weight increasing — sound bones forming — brimming with health, happiness and vitality.

HE CAN'T SAY "COW & GATE"

YET, BUT HE LOOKS IT!

NAPPIE CHANGING

Baby Lotion is every busy mother's dream-come-true. Nowadays nappie changing (most tiresome of nursery jobs) is done like this!

- 1 a teaspoonful of Baby Lotion in a saucer
- 2 a quick mop up with cottonwool dipped in Lotion
- 3 on with a fresh nappie.

Time and trouble saved . . . bowls of water and soap hardly ever needed. Wonderful for baby skin, too. Prevents nappie rash, roughness, soreness and keeps away infection; also excellent for sunburn and windburn.

Does your letterheading uphold your prestige,
or do you let your competitors get ahead of you in
this important matter?

Do you realise that the impression your letter-
heading makes on your customers is often reflected
in their orders to you?

Ask your printer to use Gateway watermarked
paper for your letterheading—a new high standard

HONGKONG'S FUNICULAR RAILWAY

(THE PEAK TRAMWAYS)

TAKES ONE **1,400** FEET ABOVE SEA-LEVEL

IN

EIGHT MINUTES

TO VIEW

*The Most Wonderful
Panorama in the world*

FAST – SAFE – UNIQUE – CHEAP

Operated since 1888, the Peak Trams offer one of the safest ways of travelling. The trams are fitted with independent wire cables, and are controlled by an electrical haulage equipment at the Upper Terminus. This equipment is operated by an engineer who can see from a track indicator exactly where the trams are at any time.

In the course of the journey the brakesman communicates with the Engine Room by a system of signals, and the Engineer moves the trams as required by the brakesman. In the event of an extreme urgency, it is only necessary for the brakesman to release his hold of the Safety Brake Bar and this action automatically closes two powerful jaws, which are fitted at each end of the chassis, onto the centre track rail which is fastened firmly to the track bed. This powerful braking system will stop the tram within eight feet on the steepest gradient of the track.

NAPPIE CHANGING

Baby Lotion is every busy mother's dream-come-true. Nowadays nappie changing (most tiresome of nursery jobs) is done like this !

- 1** a teaspoonful of Baby Lotion in a saucer
- 2** a quick mop up with cottonwool dipped in Lotion
- 3** on with a fresh nappie.

Time and trouble saved . . . bowls of water and soap hardly ever needed. Wonderful for baby skin, too. Prevents nappie rash, roughness, soreness and keeps away infection ; also excellent for sunburn and windburn.

BABY LOTION**

COW & GATE

That Cow & Gate look!

There is a feeling of restfulness throughout the house. Worry and anxiety have given place to relief and cheerfulness —
BABY IS ON COW & GATE NOW!

Look at him! All chuckles and chubbiness—weight increasing — sound bones forming—brimming with health, happiness and vitality.
HE CAN'T SAY "COW & GATE" YET, BUT HE LOOKS IT!

**RIGHT
MOTORS...**

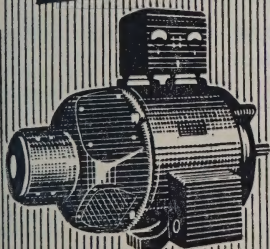

- 1 Right Kind—to match your current supply
- 2 Right Type—to meet your load characteristics
- 3 Right Protection—against atmospheric hazards
- 4 Right Size—from 1/6 to 400 horsepower

The wide range of kinds, types and sizes of Century motors makes it possible to select a standard motor to meet the requirements of all popular applications.

They are available for both AC and DC current—high, normal and low torque characteristics. Types are also available for applications requiring varying speeds and reversing direction of rotation.

...and the Right Generators

Where electric power supply is not available, Century generators will provide electricity when you want it—and where you want it. Everyone can enjoy the comfort and convenience of electric lighting and power to drive labour saving machines.

Both alternating and direct current generators are built by Century in sizes from 50 Watts to 200 kilowatts for steam, diesel, gasoline engine or water wheel drive.

Popular types and standard ratings obtainable from leading dealers or Sole Agents:—

DESIGNED TO SUCCEED ALL OVER THE WORLD

The Javelin is indeed a *newly conceived* car. The flat-four engine gives outstanding performance in the 1½ litre class, yet is compact enough to allow the rear passengers to sit “right forward” of the back axle. All round torsion bar suspension gives easy riding and delightful handling over the roughest road. It's the British Family car acclaimed by world experts—top speed 75 m.p.h.—0.50 m.p.h. in 13.5 secs.—30-32 m.p.g. under average conditions.

FOR THE PERFECT DEPARTU

DM HONG KONG P.A.L.

An aerial photograph of Hong Kong, showing the city built on hills overlooking a large harbor. In the background, there are more hills and mountains. The water is filled with many small boats and a few larger ships. The city is densely packed with buildings of various styles, including some with domes and spires. The overall tone is sepia or aged black and white.
